Abstracts

Credentialing is a common application in corporate work. Take medical staff credentialing software as an example. Manually compiling medical staff and provider credential packets is not only slow, but it creates room for error. By automating much of the medical staff credentialing process, OnBase enterprise content management (ECM) solutions help healthcare organizations comply with Joint Commission and CMS standards. And, by tracking all applications and related data in one central and secure location, OnBase helps ensure you have complete medical provider credential packets.

This report elaborates the market size, market characteristics, and market growth of the Credentialing Software industry, and breaks down according to the type, application, and consumption area of Credentialing Software. The report also conducted a PESTEL analysis of the industry to study the main influencing factors and entry barriers of the industry.

In Chapter 3.4 of the report, the impact of the COVID-19 outbreak on the industry was fully assessed. Fully risk assessment and industry recommendations were made for Credentialing Software in a special period. This chapter also compares the markets of Pre COVID-19 and Post COVID-19.
