## **Abstracts**

CT scanners use a combination of multiple X-ray measurements processed by a computer. These images are taken from different angles to render cross-sectional images, called tomographic images. In this way, areas of the body or organs can be better examined. Scanning the area comprehensively can help to better understand the problem and provide a better diagnosis.

This report elaborates the market size, market characteristics, and market growth of the CT Scanner industry, and breaks down according to the type, application, and consumption area of CT Scanner. The report also conducted a PESTEL analysis of the industry to study the main influencing factors and entry barriers of the industry.

In Chapter 3.4 of the report, the impact of the COVID-19 outbreak on the industry was fully assessed. Fully risk assessment and industry recommendations were made for CT Scanner in a special period. This chapter also compares the markets of Pre COVID-19 and Post COVID-19.
