Abstracts

Cup and Lid dispenser systems are used to keep kitchens and service areas like beverage filling stations organized by stacking the cups in different types of cup and lid dispenser systems. Cup and lid dispenser systems occupy limited commercial kitchen space. Cup and lid dispenser systems are used to organize lids of different sizes to make them more accessible to food service operators or customers. Wastage of storage space is also reduced with the use of cup and lid dispenser systems. Cup and lid dispenser systems are combinational dispenser systems that can dispense both cups and lids. These keep work stations clean and give an organized look by dispensing one cup or lid at a time.
