Abstracts

Cupboard was originally used to describe an open-shelved side table for displaying dishware, more specifically plates, cups and saucers. These open cupboards typically had between one and three display tiers, and at the time, a drawer or multiple drawers fitted to them. The word cupboard gradually came to mean a closed piece of furniture. This report elaborates the market size, market characteristics, and market growth of the Cupboards industry, and breaks down according to the type, application, and consumption area of Cupboards.
