Abstracts

Debt consolidation is a form of debt refinancing that entails taking out one loan to pay off many others. This commonly refers to a personal finance process of individuals addressing high consumer debt but occasionally refers to a country's fiscal approach to corporate debt or Government debt. The process can secure a lower overall interest rate to the entire debt load and provide the convenience of servicing only one loan. This report elaborates the market size, market characteristics, and market growth of the Debt Consolidation industry, and breaks down according to the type, application, and consumption area of Debt Consolidation. The report also conducted a PESTEL analysis of the industry to study the main influencing factors and entry barriers of the industry.

In Chapter 3.4 of the report, the impact of the COVID-19 outbreak on the industry was fully assessed. Fully risk assessment and industry recommendations were made for Debt Consolidation in a special period. This chapter also compares the markets of Pre COVID-19 and Post COVID-19.

In addition, chapters 8-12 consider the impact of COVID-19 on the regional economy.
