## Abstracts

The deployable military shelter system is one of such products for applications ranging from temporary medical support centers to accident command and death management centers to emergency distribution centers. These systems are temporarily deployed in remote areas. These systems are totally mobile in nature and are made up of technical textiles. These systems are largely used by infantry, rescue team and medical support team but constant research and development in this niche product segment unfolded new opportunities. Nowadays, the availability of housing systems for military applications is not limited to support and asylum command posts, but also includes medical facility bases and aircraft and vehicle maintenance. A few of the North American and European companies have developed deployable protection systems for use as hangers for aircraft and vehicle maintenance.

This report elaborates the market size, market characteristics, and market growth of the Deployable Military Shelter Systems industry, and breaks down according to the type, application, and consumption area of Deployable Military Shelter Systems.
