## **Abstracts**

A digital audio workstation (DAW) is an electronic device or application software used for recording, editing and producing audio files. DAWs come in a wide variety of configurations from a single software program on a laptop, to an integrated stand-alone unit, all the way to a highly complex configuration of numerous components controlled by a central computer. Regardless of configuration, modern DAWs have a central interface that allows the user to alter and mix multiple recordings and tracks into a final produced piece.

This report elaborates the market size, market characteristics, and market growth of the Digital Audio Workstation (DAWs) Software industry, and breaks down according to the type, application, and consumption area of Digital Audio Workstation (DAWs) Software. The report also conducted a PESTEL analysis of the industry to study the main influencing factors and entry barriers of the industry.
