Abstracts

Digital Writing Instruments are battery-operated writing instrument such as digital pen that enables the user to digitally record a handwritten note or drawing. A digital pen contains a universal serial bus cradle which allows the user to upload the handwritten notes to a personal computer. The pen looks similar to a regular pen and can be used in a similar way, but requires special digital paper if the user wishes to record the written data. The digital paper, has small dots on it that allow the pen to capture what has been written. Digital pens also have handwriting recognition software through which the user can convert handwritten notes into typed text. Some of the digital pens are wireless with Bluetooth technology. These pens send the captured notes or drawings directly to user's PC or cell phone.
