Abstracts

Direct-to-consumer genetic testing is marketed directly to customers via television, print advertisements, or the Internet, and the tests can be bought online or in stores.

Customers send the company a DNA sample and receive their results directly from a secure website or in a written report. Direct-to-consumer genetic testing provides people access to their genetic information without necessarily involving a healthcare provider or health insurance company in the process.

This report elaborates the market size, market characteristics, and market growth of the Direct-to-Consumer Testing industry, and breaks down according to the type, application, and consumption area of Direct-to-Consumer Testing. The report also conducted a PESTEL analysis of the industry to study the main influencing factors and entry barriers of the industry.

In Chapter 3.4 of the report, the impact of the COVID-19 outbreak on the industry was fully assessed. Fully risk assessment and industry recommendations were made for Direct-to-Consumer Testing in a special period. This chapter also compares the markets of Pre COVID-19 and Post COVID-19.
