Abstracts

A discrete GPU is a Graphics Processing Unit that is not part of the CPU, ie, it's a separate add in board or a separate chip on the system board (usually in laptops and AIOs.) Discrete GPUs also use their own VRAM instead of using system RAM for video processing.

This report elaborates the market size, market characteristics, and market growth of the Discrete GPU industry, and breaks down according to the type, application, and consumption area of Discrete GPU. The report also conducted a PESTEL analysis of the industry to study the main influencing factors and entry barriers of the industry.

In Chapter 3.4 of the report, the impact of the COVID-19 outbreak on the industry was fully assessed. Fully risk assessment and industry recommendations were made for Discrete GPU in a special period. This chapter also compares the markets of Pre COVID-19 and Post COVID-19.
