## Abstracts

Distance learning refers to the teaching mode of using media such as television and internet. It breaks through the boundaries of space and is different from the traditional teaching mode in which students need to sit in the classroom. Students who use this mode of teaching, usually amateur learners, can attend classes anytime, anywhere, as they do not need to attend a specific location. Colleges and universities offering distance education offer courses at the university or college level, including master's and doctoral degrees. There are also a few institutions offering distance learning courses at the secondary level.
