Abstracts

Distillation columns are key unit operations in traditional chemical engineering, especially in the oil and gas industry. They are usually tall structures filled with heated flammable fluids, and are consequently inherently hazardous.

This report elaborates the market size, market characteristics, and market growth of the Distillation Columns industry, and breaks down according to the type, application, and consumption area of Distillation Columns. The report also conducted a PESTEL analysis of the industry to study the main influencing factors and entry barriers of the industry.

In Chapter 3.4 of the report, the impact of the COVID-19 outbreak on the industry was fully assessed. Fully risk assessment and industry recommendations were made for Distillation Columns in a special period. This chapter also compares the markets of Pre COVID-19 and Post COVID-19.
