Abstracts

A dog crate is a metal, wire, plastic, or fabric enclosure with a door in which a dog may be kept for security or transportation. Dog crates are designed to replicate a dog's natural den and as such can provide them with a place of refuge at home or when traveling to new surroundings. Other common reasons for using a dog crate are for toilet training a new puppy, transporting a dog, limiting access while the dog learns rules, ensuring the dog's safety, confining a dog in locations where dogs cannot safely or legally roam freely, or giving a dog a place to go when visitors come to the house. This report elaborates the market size, market characteristics, and market growth of the Dog Crates industry, and breaks down according to the type, application, and consumption area of Dog Crates. The report also conducted a PESTEL analysis of the industry to study the main influencing factors and entry barriers of the industry.
