Abstracts

Drone is an aircraft without a human pilot aboard. Drones are a component of an unmanned aircraft system (UAS); which include a drone, a ground-based controller, and a system of communications between the two. The flight of drones may operate with various degrees of autonomy: either under remote control by a human operator or autonomously by onboard computers.

This report elaborates the market size, market characteristics, and market growth of the Drone industry, and breaks down according to the type, application, and consumption area of Drone. The report also conducted a PESTEL analysis of the industry to study the main influencing factors and entry barriers of the industry.
