Abstracts

Earthworks Estimating Software is a subset of CAD software. Typically, earthmoving software is an add-on form of a more general-purpose CAD software package (such as AutoCAD), rather than a stand-alone product. Earthmoving software is primarily used to calculate cut and fill volumes and then used to generate material and time estimates. This report elaborates the market size, market characteristics, and market growth of the Earthworks Estimating Software industry, and breaks down according to the type, application, and consumption area of Earthworks Estimating Software. The report also conducted a PESTEL analysis of the industry to study the main influencing factors and entry barriers of the industry.

In Chapter 3.4 of the report, the impact of the COVID-19 outbreak on the industry was fully assessed. Fully risk assessment and industry recommendations were made for Earthworks Estimating Software in a special period. This chapter also compares the markets of Pre COVID-19 and Post COVID-19.
