Abstracts

E-commerce software is a platform or engine that helps control and manage inventory, add or remove products, calculate taxes, process payments, maintain e-commerce website, and fulfill orders. E-commerce software enables users and businesses to simplify multifaceted and complex operations and processes performed by online stores. Additionally, several small, medium, and large businesses are focusing on delivering optimal shopping experience with the help of e-commerce software. E-commerce software helps businesses to effectively and efficiently manage multiple applications including catalog management, channel management, customer accounts, email marketing, inventory management, loyalty program, and multi-store management. These applications enable e-commerce software to simplify marketing and automate shipping and taxes. Furthermore, e-commerce software vendors are offering solutions capable of integrating with various enterprise software such as enterprise resource planning (ERP), accounting software, 3PL, social media, and customer relationship management (CRM) in order to provide all-in-one platform to businesses. Moreover, e-commerce software also provide a variety of features including custom e-commerce content management system (CMS), security, and e-commerce POS development.
This report elaborates the market size, market characteristics, and market growth of the Ecommerce Shopping Cart Software industry, and breaks down according to the type, application, and consumption area of Ecommerce Shopping Cart Software. The report also conducted a PESTEL analysis of the industry to study the main influencing factors and entry barriers of the industry.

In Chapter 3.4 of the report, the impact of the COVID-19 outbreak on the industry was fully assessed. Fully risk assessment and industry recommendations were made for Ecommerce Shopping Cart Software in a special period. This chapter also compares
