Abstracts

Content management systems for education are simply those that are focused and sometimes expressly built just for educators and those working in large institutions. Much like with any CMS, there are content creators on the back end, and end users on the front end. The teachers and administrators create content in the form of grades and progress reports, for example. Parents and students can then simply visit a central website for a school or district to get the information they need.

This report elaborates the market size, market characteristics, and market growth of the Education Content Management industry, and breaks down according to the type, application, and consumption area of Education Content Management. The report also conducted a PESTEL analysis of the industry to study the main influencing factors and entry barriers of the industry.

In Chapter 3.4 of the report, the impact of the COVID-19 outbreak on the industry was fully assessed. Fully risk assessment and industry recommendations were made for Education Content Management in a special period. This chapter also compares the markets of Pre COVID-19 and Post COVID-19.

In addition, chapters 8-12 consider the impact of COVID-19 on the regional economy.
