Abstracts

EEG biometric technology measures and records the electrical activity of the brain. These electrical patterns are analyzed for authentication and stored for further reference.

ECG is a diagnostic tool that helps assess the electrical activity of an individual's heart. When it is integrated with biometric solutions, it is used for authentication purposes as every individual has a different cardiac muscle movement and resultant electrical activity.

This report elaborates the market size, market characteristics, and market growth of the EEG and ECG Biometrics industry, and breaks down according to the type, application, and consumption area of EEG and ECG Biometrics. The report also conducted a PESTEL analysis of the industry to study the main influencing factors and entry barriers of the industry.
