Abstracts

Electric irons are tools for leveling clothes and fabrics, typically between 300 and 1000W. Its model can be divided into: ordinary type, temperature control type, steam spray type and so on. The ordinary irons are simple in structure, low in price, and easy to manufacture and maintain. The temperature-adjustable iron can be automatically adjusted to a temperature in the range of 60-250 ° C and automatically cuts off the power according to the different materials used, saving power at an appropriate temperature than the average type of iron.

This report elaborates the market size, market characteristics, and market growth of the Electric Iron industry, and breaks down according to the type, application, and consumption area of Electric Iron. The report also conducted a PESTEL analysis of the industry to study the main influencing factors and entry barriers of the industry.
