## **Abstracts**

EMC refers to the ability of electrical equipment to operate efficiently in an electromagnetic environment without being affected or affected by other equipment in its vicinity. EMC shielding is the protection provided to electrical and electronic equipment to protect them from EMI. EMI refers to the phenomenon that electromagnetic radiation affects the performance of electrical and electronic equipment. EMC shielding is used in many industries because it can effectively offset the effects of EMI.

This report elaborates the market size, market characteristics, and market growth of the Electromagnetic Compatibility (EMC) Shielding industry, and breaks down according to the type, application, and consumption area of Electromagnetic Compatibility (EMC) Shielding. The report also conducted a PESTEL analysis of the industry to study the main influencing factors and entry barriers of the industry.

In Chapter 3.4 of the report, the impact of the COVID-19 outbreak on the industry was fully assessed. Fully risk assessment and industry recommendations were made for Electromagnetic Compatibility (EMC) Shielding in a special period.
