## **Abstracts**

An electronic trial master file (eTMF) is a trial master file in electronic (digital content) format. It is a type of content management system for the pharmaceutical industry, providing a formalized means of organizing and storing documents, images, and other digital content for pharmaceutical clinical trials that may be required for compliance with government regulatory agencies. The term eTMF encompasses strategies, methods and tools used throughout the lifecycle of the clinical trial regulated content.

This report elaborates the market size, market characteristics, and market growth of the Electronic Trial Master File (eTMF) industry, and breaks down according to the type, application, and consumption area of Electronic Trial Master File (eTMF). The report also conducted a PESTEL analysis of the industry to study the main influencing factors and entry barriers of the industry.
