Abstracts

Steel wire rope is a piece of machinery which is widely used in construction, mining, oil & gas extraction and other areas. Usually a steel wire rope is composed of wires, strands and a core, which is made of fiber or steel. The purpose of the core is to provide support and maintain the position of the outer strands during operation. The wires are predominantly constructed from high-carbon steel and stainless steel. The wires are twisted to form strands and they designate the strength of the steel wire rope.

This report elaborates the market size, market characteristics, and market growth of the Elevator Wire Rope industry, and breaks down according to the type, application, and consumption area of Elevator Wire Rope. The report also conducted a PESTEL analysis of the industry to study the main influencing factors and entry barriers of the industry.

In Chapter 3.4 of the report, the impact of the COVID-19 outbreak on the industry was fully assessed. Fully risk assessment and industry recommendations were made for Elevator Wire Rope in a special period. This chapter also compares the markets of Pre COVID-19 and Post COVID-19.
