## Abstracts

Ethoxyquin (EQ) is a clear, viscous, light yellow to dark brown liquid, with an unpleasant, mercaptan-like smell, that causes irritation of the skin and eyes. It is absorbed through the skin, and is moderately toxic by ingestion. It darkens on exposure to light and air and tends to polymerize, particularly at temperatures above 160 °C (hazardous exothermic reaction). EQ is considered a highly effective antioxidant, is cheap and has a very long shelf-life.

This report elaborates the market size, market characteristics, and market growth of the Ethoxyquin industry, and breaks down according to the type, application, and consumption area of Ethoxyquin. The report also conducted a PESTEL analysis of the industry to study the main influencing factors and entry barriers of the industry.
