Abstracts

Ethylenediamine (EDA) is a robust base and chelating agent, which is characterized by its clear liquid-like colorlessness and ammonia-like odor. Though there are several precautions that must be taken during the handling of ethylenediamine, as it can be severely hazardous to health and can even cause blindness as a result of high exposure, it is highly useful too for a number of industries such as paints and coatings, agrochemicals, pharmaceuticals, mining and textile, and fuel and energy.

This report elaborates the market size, market characteristics, and market growth of the Ethylenediamine(EDA) industry, and breaks down according to the type, application, and consumption area of Ethylenediamine(EDA). The report also conducted a PESTEL analysis of the industry to study the main influencing factors and entry barriers of the industry.

In Chapter 3.4 of the report, the impact of the COVID-19 outbreak on the industry was fully assessed. Fully risk assessment and industry recommendations were made for Ethylenediamine(EDA) in a special period. This chapter also compares the markets of Pre COVID-19 and Post COVID-19.
