Abstracts

Event data loggers do not monitor a continuously changing variable, like temperature, pressure and flow. They only detect when something happened, how long it happened, or how many times it happened. In this sense, event data loggers monitor discrete (on/off) signals for changes in state in various ways, and those changes are logged along with the date and time of occurrence.

This report elaborates the market size, market characteristics, and market growth of the Event Data Loggers industry, and breaks down according to the type, application, and consumption area of Event Data Loggers. The report also conducted a PESTEL analysis of the industry to study the main influencing factors and entry barriers of the industry.

In Chapter 3.4 of the report, the impact of the COVID-19 outbreak on the industry was fully assessed. Fully risk assessment and industry recommendations were made for Event Data Loggers in a special period. This chapter also compares the markets of Pre COVID-19 and Post COVID-19.
