## **Abstracts**

Exploration and production (E&P) software is defined as a set of software solutions developed specifically for the upstream segment of the oil & gas industry. These are designed to cater to a wide range of applications in the upstream sector including seismic processing & imaging, mapping, data analysis, reservoir & geological modeling and production planning. Using E&P software enables the oil & gas companies to better analyze the geological data for more accurate modeling and production planning. This report elaborates the market size, market characteristics, and market growth of the Exploration and Production (E&P) Software industry, and breaks down according to the type, application, and consumption area of Exploration and Production (E&P) Software. The report also conducted a PESTEL analysis of the industry to study the main influencing factors and entry barriers of the industry.

In Chapter 3.4 of the report, the impact of the COVID-19 outbreak on the industry was fully assessed. Fully risk assessment and industry recommendations were made for Exploration and Production (E&P) Software in a special period. This chapter also compares the markets of Pre COVID-19 and Post COVID-19.

In addition, chapters 8-12 consider the impact of COVID-19 on the regional economy.
