Abstracts

Explosives and narcotics trace detectors refer to the equipment which allow the discovery of a small magnitude of narcotics and explosives. The detection is accomplished by sampling invisible trace amounts of particulates. This equipment is used in vulnerable areas considered susceptible to unlawful interference such as cargo facilities, access control points of critical infrastructure, and airports. The ETD technology is used to detain people handling narcotics and explosives and to identify traffickers of illicit material. Moreover, it restricts narcotics trafficking, thereby increasing homeland security.

This report elaborates the market size, market characteristics, and market growth of the Explosives & Narcotics Trace Detection Devices industry, and breaks down according to the type, application, and consumption area of Explosives & Narcotics Trace Detection Devices. The report also conducted a PESTEL analysis of the industry to study the main influencing factors and entry barriers of the industry.
