Abstracts

An external storage is a type of storage device, which can store the information for the data transfer from one device to other devices. These storage devices are not interpolated within the system. It is also referred as an external storage system or a secondary storage system. These storage devices are not restricted to a particular device and can be moved from one place to another without any data interruption. This report elaborates the market size, market characteristics, and market growth of the External Storage industry, and breaks down according to the type, application, and consumption area of External Storage. The report also conducted a PESTEL analysis of the industry to study the main influencing factors and entry barriers of the industry.
