Abstracts

Primers create a barrier between the skin and your foundation, allowing base to stay fresh and flawless. This essential can correct discoloration, blur pores, smooth fine lines, and magically set makeup for hours. Similar to foundation itself, primer can be applied with fingertips, a sponge, or a brush. Many makeup primers are formulated with silicone-based polymers, like dimethicone, because of their ultra-smoothing effects. This report elaborates the market size, market characteristics, and market growth of the Face Primer industry, and breaks down according to the type, application, and consumption area of Face Primer. The report also conducted a PESTEL analysis of the industry to study the main influencing factors and entry barriers of the industry.

In Chapter 3.4 of the report, the impact of the COVID-19 outbreak on the industry was fully assessed. Fully risk assessment and industry recommendations were made for Face Primer in a special period. This chapter also compares the markets of Pre COVID-19 and Post COVID-19.

In addition, chapters 8-12 consider the impact of COVID-19 on the regional economy.
