## Abstracts

Fashion is best defined as the style (or styles) of clothing, footwear and accessories worn at any given time by groups of people. There may appear to be differences between the styles of designer fashions, which are unique as well as expensive, and the mass-produced apparels and street-styles sold in malls and markets around the world. This report elaborates the market size, market characteristics, and market growth of the Fashion Retailing industry, and breaks down according to the type, application, and consumption area of Fashion Retailing. The report also conducted a PESTEL analysis of the industry to study the main influencing factors and entry barriers of the industry.

In Chapter 3.4 of the report, the impact of the COVID-19 outbreak on the industry was fully assessed. Fully risk assessment and industry recommendations were made for Fashion Retailing in a special period. This chapter also compares the markets of Pre COVID-19 and Post COVID-19.

In addition, chapters 8-12 consider the impact of COVID-19 on the regional economy.
