Abstracts

CFD (computational fluid dynamics) includes any numerical method used to solve fluid flow problems. FEA (finite element analysis) is one numerical method for solving partial differential equations, independent of what the equations are modelling. Simulation and Analysis Softwares is a program that allows the user to observe an operation through simulation without actually performing that operation.

This report elaborates the market size, market characteristics, and market growth of the FEA & CFD Simulation and Analysis Softwares industry, and breaks down according to the type, application, and consumption area of FEA & CFD Simulation and Analysis Softwares. The report also conducted a PESTEL analysis of the industry to study the main influencing factors and entry barriers of the industry.

In Chapter 3.4 of the report, the impact of the COVID-19 outbreak on the industry was fully assessed. Fully risk assessment and industry recommendations were made for FEA & CFD Simulation and Analysis Softwares in a special period.
