## Abstracts

Fermented foods belong to a category of foods called functional foods that are known to have a positive effect on health. Probiotics are the bacteria used to ferment traditional foods. Thus, fermented foods and probiotics are closely related and co-exist due to the health attributes associated with their intake. However, the efficacy of probiotics is enhanced when taken in the form of fermented food rather than as probiotics alone. The gaining popularity of probiotics leads a growth of functional food and beverage market which in-turn is driving the fermented food and drinks market.

This report elaborates the market size, market characteristics, and market growth of the Fermented Food and Drinks industry, and breaks down according to the type, application, and consumption area of Fermented Food and Drinks. The report also conducted a PESTEL analysis of the industry to study the main influencing factors and entry barriers of the industry.

In Chapter 3.4 of the report, the impact of the COVID-19 outbreak on the industry was fully assessed. Fully risk assessment and industry recommendations were made for Fermented Food and Drinks in a special period. This chapter also compares the markets of Pre COVID-19 and Post COVID-19.
