Abstracts

A protease (also called a peptidase or proteinase) is an enzyme that performs proteolysis: protein catabolism by hydrolysis of peptide bonds. Proteases have evolved multiple times, and different classes of protease can perform the same reaction by completely different catalytic mechanisms. Proteases can be found in Animalia, Plantae, Fungi, Bacteria, Archaea and viruses.

This report elaborates the market size, market characteristics, and market growth of the Ficin Proteinase industry, and breaks down according to the type, application, and consumption area of Ficin Proteinase. The report also conducted a PESTEL analysis of the industry to study the main influencing factors and entry barriers of the industry.
