Abstracts

Film distribution is the process of making a movie available for viewing by an audience. This is normally the task of a professional film distributor, who would determine the marketing strategy for the film, the media by which a film is to be exhibited or made available for viewing, and who may set the release date and other matters. The film may be exhibited directly to the public either through a movie theater or television, or personal home viewing (including DVD, video-on-demand, download, television programs through broadcast syndication). For commercial projects, film distribution is usually accompanied by film promotion.

This report elaborates the market size, market characteristics, and market growth of the Film Distribution industry, and breaks down according to the type, application, and consumption area of Film Distribution. The report also conducted a PESTEL analysis of the industry to study the main influencing factors and entry barriers of the industry.

In Chapter 3.4 of the report, the impact of the COVID-19 outbreak on the industry was fully assessed. Fully risk assessment and industry recommendations were made for Film Distribution in a special period. This chapter also compares the markets of Pre COVID-19 and Post COVID-19.

In addition, chapters 8-12 consider the impact of COVID-19 on the regional economy.
