Abstracts

Solar Mounting Systems are used to fix solar panels on surfaces like roofs, building facades, or the ground. Commercial and industrial solar applications are often found on large flat rooftops, like on big-box stores or manufacturing plants. These roofs may still have a slight tilt but not nearly as much as sloped residential roofs. Solar mounting systems for flat roofs are commonly ballasted with few penetrations.

This report elaborates the market size, market characteristics, and market growth of the Flat Roof Mounting Systems industry, and breaks down according to the type, application, and consumption area of Flat Roof Mounting Systems. The report also conducted a PESTEL analysis of the industry to study the main influencing factors and entry barriers of the industry.

In Chapter 3.4 of the report, the impact of the COVID-19 outbreak on the industry was fully assessed. Fully risk assessment and industry recommendations were made for Flat Roof Mounting Systems in a special period. This chapter also compares the markets of Pre COVID-19 and Post COVID-19.

In addition, chapters 8-12 consider the impact of COVID-19 on the regional economy.
