## Abstracts

Floral Flavors and ingredients are used in food and beverages because they impart not only distinct flavors but also possess several health benefits. Flowers contain various levels of anti-oxidants, minerals and vitamins, and other nutrients. They enhance the taste and aroma of food and beverages without adding any extra calories. Different flowers and their extracts have different applications. Hibiscus-infused drinks such as hibiscus tea help in lowering blood pressure, support healthy cholesterol and triglycerides, fight cancer, prevent oxidative stress, reduce the risk of obesity, act as anti-depressants, and prevent the formation of kidney stones.

This report elaborates the market size, market characteristics, and market growth of the Floral Flavours industry, and breaks down according to the type, application, and consumption area of Floral Flavours. The report also conducted a PESTEL analysis of the industry to study the main influencing factors and entry barriers of the industry.

In Chapter 3.4 of the report, the impact of the COVID-19 outbreak on the industry was fully assessed. Fully risk assessment and industry recommendations were made for Floral Flavours in a special period. This chapter also compares the markets of Pre COVID-19 and Post COVID-19.

In addition, chapters 8-12 consider the impact of COVID-19 on the regional economy.
