Abstracts

Vending machines have been used to sell food for a long time, but they've rarely focused on fresh – now that's changing. Entrepreneurs are beginning to use them to reduce the retail selling costs of fresh food while improving the shopping experience in two ways: by shortening the supply chain for high-demand locally produced products, and making those products available 24/7 in convenient locations.

This report elaborates the market size, market characteristics, and market growth of the Fresh Food Vending Machines industry, and breaks down according to the type, application, and consumption area of Fresh Food Vending Machines. The report also conducted a PESTEL analysis of the industry to study the main influencing factors and entry barriers of the industry.
