Abstracts

French fries, or just fries ; chips or French-fried potatoes are batonnet or allumette-cut deep-fried potatoes. In the United States and most of Canada, the term fries refers to all dishes of fried elongated pieces of potatoes, while in the United Kingdom, Australia, South Africa (rarely), Ireland and New Zealand, thinly cut fried potatoes are sometimes called shoestring fries or skinny fries to distinguish them from chips, which are cut thicker. Frozen French fries are a series of freshly baked French fries that are directly frozen and have a long shelf life and can be eaten immediately.

This report elaborates the market size, market characteristics, and market growth of the Frozen French Fries industry, and breaks down according to the type, application, and consumption area of Frozen French Fries. The report also conducted a PESTEL analysis of the industry to study the main influencing factors and entry barriers of the industry.

In Chapter 3.4 of the report, the impact of the COVID-19 outbreak on the industry was fully assessed. Fully risk assessment and industry recommendations were made for Frozen French Fries in a special period. This chapter also compares the markets of Pre COVID-19 and Post COVID-19.

In addition, chapters 8-12 consider the impact of COVID-19 on the regional economy.
