## Abstracts

Pectin is a naturally occurring soluble fiber, structural heteropolysaccharide, which is usually found in apples, lemons, oranges, berries, and other fruits. Unripe fruits generally have more pectin than ripe fruits. Pectin is commercially manufactured as brown powder, extracted primarily from citrus fruits. Pears, apples, guavas, quince, plums, gooseberries, and citrus fruits such as oranges contain large amount of pectin, while soft fruits such as cherries, grapes, and strawberries contain less amount of pectin. Pectin is primarily used as a gelling and thickening agent and stabilizer in a number of fruit products, such as marmalades, fruit-based preparations such as yogurts, drinks, ice creams, desserts, and bakery products.
