Abstracts

The functionalized graphene oxide is an oxide of graphene, and its color is brownish yellow, and it is in the form of powder or solution. Since it has more oxygen-containing functional groups after oxidation, it is more active than graphene, and its properties can be improved through various reactions with oxygen-containing functional groups.

This report elaborates the market size, market characteristics, and market growth of the Functionalized Graphene Oxide industry, and breaks down according to the type, application, and consumption area of Functionalized Graphene Oxide. The report also conducted a PESTEL analysis of the industry to study the main influencing factors and entry barriers of the industry.

In Chapter 3.4 of the report, the impact of the COVID-19 outbreak on the industry was fully assessed. Fully risk assessment and industry recommendations were made for Functionalized Graphene Oxide in a special period. This chapter also compares the markets of Pre COVID-19 and Post COVID-19.
