## Abstracts

A Gantt chart is a type of bar chart that illustrates a project schedule. This chart lists the tasks to be performed on the vertical axis, and time intervals on the horizontal axis. The width of the horizontal bars in the graph shows the duration of each activity. Gantt charts illustrate the start and finish dates of the terminal elements and summary elements of a project. Terminal elements and summary elements constitute the work breakdown structure of the project. Modern Gantt charts also show the dependency (i.e., precedence network) relationships between activities.

This report elaborates the market size, market characteristics, and market growth of the Gantt Chart Software industry, and breaks down according to the type, application, and consumption area of Gantt Chart Software. The report also conducted a PESTEL analysis of the industry to study the main influencing factors and entry barriers of the industry.
