Abstracts

Glass-fiber-reinforced (GFR) plastic pipes are pipes manufactured from the GFR plastic material, also known as GRP (Glass-fiber-reinforced Plastic) or FRP (Fiberglass-reinforced Plastic). The material is a combination of glass fibers and resins, wherein resins provide chemical and environmental resistance to the product, apart from acting as a binder for glass fibers in the structural laminate.

This report elaborates the market size, market characteristics, and market growth of the Glass Reinforced Plastic Piping industry, and breaks down according to the type, application, and consumption area of Glass Reinforced Plastic Piping. The report also conducted a PESTEL analysis of the industry to study the main influencing factors and entry barriers of the industry.
