Abstracts

Glutaric acid is naturally produced in the body during the metabolism of some amino acids, including lysine and tryptophan. Defects in this metabolic pathway can lead to a disorder called glutaric aciduria, where toxic byproducts build up and can cause severe encephalopathy.

This report elaborates the market size, market characteristics, and market growth of the Glutaric Acid industry, and breaks down according to the type, application, and consumption area of Glutaric Acid. The report also conducted a PESTEL analysis of the industry to study the main influencing factors and entry barriers of the industry.

In Chapter 3.4 of the report, the impact of the COVID-19 outbreak on the industry was fully assessed. Fully risk assessment and industry recommendations were made for Glutaric Acid in a special period. This chapter also compares the markets of Pre COVID-19 and Post COVID-19.
