Abstracts

Gray iron, or grey cast iron, is a type of cast iron that has a graphitic microstructure. It is named after the gray color of the fracture it forms, which is due to the presence of graphite. Cast iron pipe is a pipe which has had historic use as a pressure pipe for transmission of water, gas and sewage, and as a water drainage pipe during the 19th and 20th centuries. It comprises predominantly a gray cast iron tube and was frequently used uncoated, although later coatings and linings reduced corrosion and improve hydraulics.

This report elaborates the market size, market characteristics, and market growth of the Gray Iron Pipe industry, and breaks down according to the type, application, and consumption area of Gray Iron Pipe. The report also conducted a PESTEL analysis of the industry to study the main influencing factors and entry barriers of the industry.
