Abstracts

Hair-cutting scissors are scissors that are specifically designed for cutting hair. They are also known as barber scissors, hairdressing scissors, or hair scissors. Hair-cutting scissors are significantly sharper than scissors, and designed specifically for cutting hair. Scissors range in size from about 5 to 7 inches (13 to 18 cm) long. They commonly have an appendage, known as a finger brace or tang, attached to one of the finger rings. This gives the user additional control when cutting.
