Abstracts

A conveyor belt is the carrying medium of a belt conveyor system (often shortened to belt conveyor). A belt conveyor system is one of many types of conveyor systems. A belt conveyor system consists of two or more pulleys (sometimes referred to as drums), with an endless loop of carrying medium—the conveyor belt—that rotates about them. One or both of the pulleys are powered, moving the belt and the material on the belt forward. The powered pulley is called the drive pulley while the unpowered pulley is called the idler pulley.

This report elaborates the market size, market characteristics, and market growth of the Heavy Duty Conveyor Belts industry, and breaks down according to the type, application, and consumption area of Heavy Duty Conveyor Belts. The report also conducted a PESTEL analysis of the industry to study the main influencing factors and entry barriers of the industry.
