Abstracts

The Heavy and Civil Engineering Construction subsector comprises establishments whose primary activity is the construction of entire engineering projects (e.g., highways and dams), and specialty trade contractors, whose primary activity is the production of a specific component for such projects. Specialty trade contractors in Heavy and Civil Engineering Construction generally are performing activities that are specific to heavy and civil engineering construction projects and are not normally performed on buildings. The work performed may include new work, additions, alterations, or maintenance and repairs. Specialty trade activities are classified in this subsector if the skills and equipment present are specific to heavy or civil engineering construction projects. For example, specialized equipment is needed to paint lines on highways.

This report elaborates the market size, market characteristics, and market growth of the Heavy And Civil Engineering Construction industry, and breaks down according to the type, application, and consumption area of Heavy And Civil Engineering Construction. The report also conducted a PESTEL analysis of the industry to study the main influencing factors and entry barriers of the industry.
