Abstracts

Biological drugs are usually derived from living organisms and can come from many sources such as humans, animals, microorganisms, or yeasts. A biologically similar drug is a biological product. In addition to meeting other criteria stipulated by law, the data proves to be highly similar to biological drugs (reference drugs) that have been approved by the FDA, and has no clinical difference in terms of safety, purity, and efficacy. Herceptin Biosimilar is approved for all indications in the Herceptin label, including HER2-overexpressing breast or metastatic stomach cancer (gastric or gastroesophageal junction adenocarcinoma).

This report elaborates the market size, market characteristics, and market growth of the Herceptin Biosimilar industry, and breaks down according to the type, application, and consumption area of Herceptin Biosimilar. The report also conducted a PESTEL analysis of the industry to study the main influencing factors and entry barriers of the industry.

In Chapter 3.4 of the report, the impact of the COVID-19 outbreak on the industry was fully assessed. Fully risk assessment and industry recommendations were made for Herceptin Biosimilar in a special period. This chapter also compares the markets of Pre COVID-19 and Post COVID-19.
