Home care (also referred to as domiciliary care, social care, or in-home care) is supportive care provided in the home. Care may be provided by licensed healthcare professionals who provide medical treatment needs or by professional caregivers who provide daily assistance to ensure the activities of daily living (ADLs) are met. In-home medical care is often and more accurately referred to as home health care or formal care. Often, the term home health care is used to distinguish it from non-medical care, custodial care, or private-duty care which refers to assistance and services provided by persons who are not nurses, doctors, or other licensed medical personnel. For terminally ill patients, home care may include hospice care. For patients recovering from surgery or illness, home care may include rehabilitative therapies.
