Abstracts

The heating, ventilation and air conditioning systems (HVAC) need to be energy efficient and help reduce operating costs. In buildings ranging from office towers to hospitals, schools to data centers, and across many applications - including air handlers, water pumps, cooling towers and chillers - all use electric motors that can help ensure are run in the most efficient and reliable manner. That's where variable speed drives (VFD) for HVAC can help. They are simple to set up, and the drives integrate seamlessly into building management and automation systems.

This report elaborates the market size, market characteristics, and market growth of the HVAC Drives industry, and breaks down according to the type, application, and consumption area of HVAC Drives. The report also conducted a PESTEL analysis of the industry to study the main influencing factors and entry barriers of the industry.

In Chapter 3.4 of the report, the impact of the COVID-19 outbreak on the industry was fully assessed. Fully risk assessment and industry recommendations were made for HVAC Drives in a special period. This chapter also compares the markets of Pre COVID-19 and Post COVID-19.
